SWE: Invent Your Future Speaking Program

Inspire Young Women Inventors to Consider Engineering and STEM!

In partnership with local SWE Section events, Invention Convention Worldwide Affiliates can engage with their local SWE Section to create mutual speaking and presentation opportunities to inspire young women to consider engineering and STEM careers.

Your Opportunity

- **Inspire students.** Student inventors do not have a chance to hear from many engineers. They will be inspired by hearing an SWE engineer speak about her love for engineering at a local Invention Convention event.
- **Inspire SWE Section member engineers.** Listening to a young student inventor at an SWE Section event will inspire SWE engineers.

Your Obligation

- **Coordinate.** Invite and coordinate SWE Section members to speak at one of your Invention Convention events.
- **Outreach.** Suggest to your local SWE Section that one of your young female student inventors be invited to speak at one of their events.

How to Get Started

1. Fill out and submit the attached contact form. We will research the best local SWE Section contact for you, given your interests, and make the connection.
2. Connect with your local SWE Section contact, start the conversation and decide on a course of action.
3. Enjoy the fruits of your engagement as you inspire future young women inventors.

Quick List

- Fill out and submit contact form.
- Connect with your local SWE Section contact and start the conversation.
- Invite an SWE Section member to speak at your Invention Convention event.
